

A modern living room interior with a large TV, sofas, and a plant. The room is dimly lit, with a large window on the left and a potted plant on the right. The TV screen is the focal point, displaying the PROPVIZ logo.

PROPVIZ

.....

The Best Property Visualisation Platform

What is PROPviz?

***PROPviz is immersive,
functional and innovative
visual experience that will
WOW your clients and
potential buyers.***

Presentation is everything when it comes to selling your property. It goes for both physical presentation and also your digital or online presentation. Potential buyers will have more trust towards properties that are well presented and photographed beautifully.

This is where we came in. It's not just still photography for your property but a visual experience for your audience.

How does it work?

Combining the best of immersive photography, videography and innovative technology.

PROPVIZ utilises an advanced depth-sensing 360° camera to scan the interior of your property and create a true to scale interactive floor. You can select hot spots and enjoy the property's interior and exterior in a 360° panoramic image.

To add into the immersiveness of the experience, viewers can use VR headset to feel as if they're in the room themselves.

At the same time we offer aerial photography service using the latest drones to give viewers the best visual experience of your property.

Core Services

360° Interior and Exterior Visualisation

We are using a well proven 3D visualisation platform Matterport. It scans the room to create a 3D model of the space and gives reliable measurement. It is Virtual Reality ready and can be viewed on all devices from desktop to mobile.

Aerial Videos

Location, location and location are the buzzword in the property market. Aerial videos and photos allow us to give a glimpse of the property area, pointing out the different amenities in the area like transport, public schools, shopping precinct and hospitals.

VR Ready Embedded Content

The scan result is Virtual Reality from the get go. It's easy to embed on your website or a bespoke app that you've created to promote your space..

VR ready

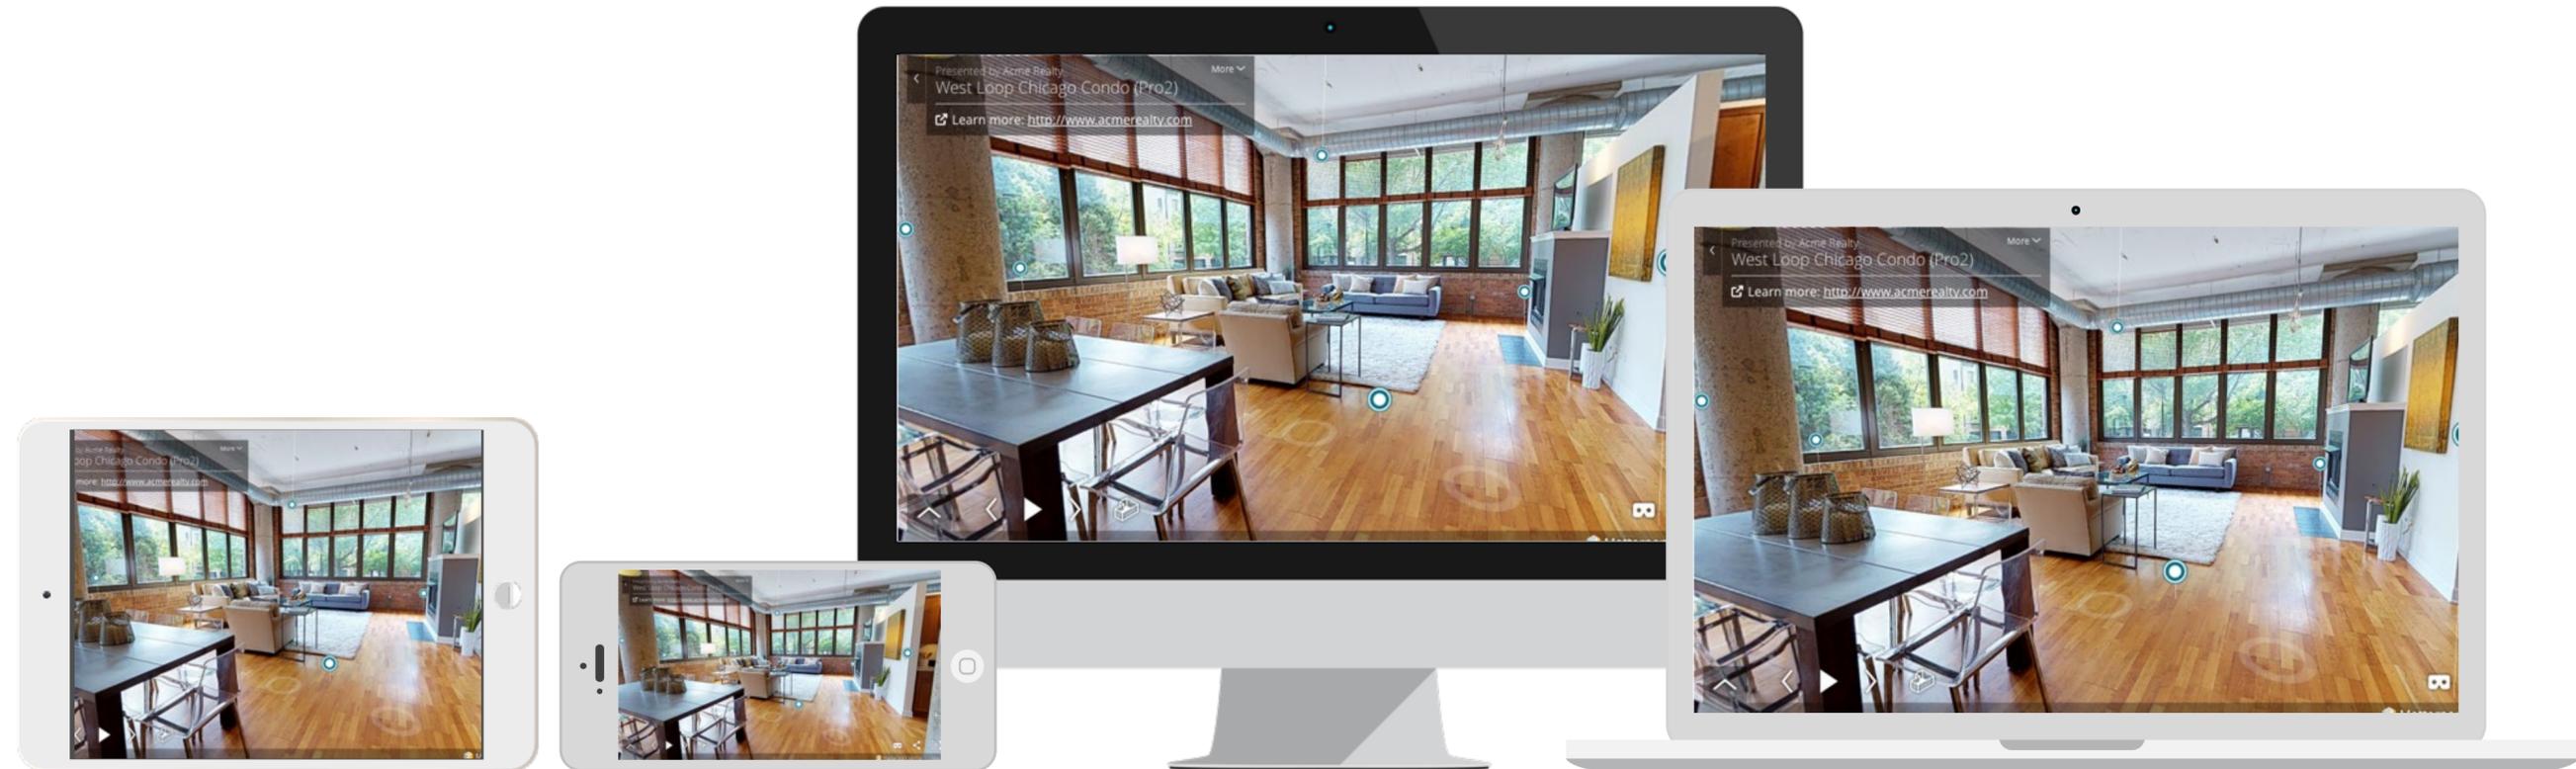

Make your property business future proof to be in line with the rise of Virtual Reality applications.

VR will give your potential buyers an immersive visual experience.

This gives your property more exposure to remote buyers or international buyers.

Immersive Experience on All Devices

PROPVIZ is available on all your devices from desktop to mobile. It's a web based service that won't need your clients to download an app.

Snapshots examples

We provide 4K resolution size exports for 360 panorama snapshots and still frames from our scan. This reduces the need to get a professional photographer to get high resolution photos.

You can start anything you want

Our scanning hardware is not designed to scan outdoors and spaces full of people. As you can see here, the person looks blurry. We do provide image correction service, but we highly recommend to capture the space without any people around .

PROPVIZ

Core Services Process & Delivery

SCOPING

1

We create a scope of work for the client, tailored to the client's need and end goal.

PROPERTY SCAN

2

We come to the property to do our 3D scan + aerial drone filming. Scanning time depends on the amount of vantage points and the size of the property.

EDIT & UPLOAD

3

We edit the footage, ensuring they're at the best quality for presentation.

LAUNCH

4

We launch the property visualisation, it can be embedded into your website and used as social media content.
